

Carl's Jr.

Palm Springs, CA

This unique design was created to honor a local architect, Albert Frey, whose prominent work in the area is now listed in the City historical registry. Natural earthtone finishes blend well with the surrounding landscape. The 3,900 square foot building features an indoor playland, drive-thru, and outdoor dining.

Yuma, AZ

This 4,200 square foot drive-thru restaurant provides seating for 96. The design featured an attractive indoor, fully air-conditioned play area for family dining entertainment. The project site is situated in an "aesthetic overlay" corridor that required special architectural and landscape design.
